flexible display system

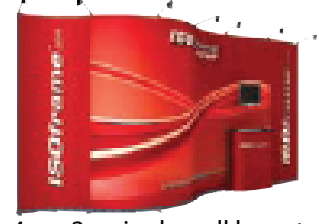

Alternative layouts,
created using the same
graphics and framework as
the main image.

4m x 2m three wall layout

4m x 3m two wall layout

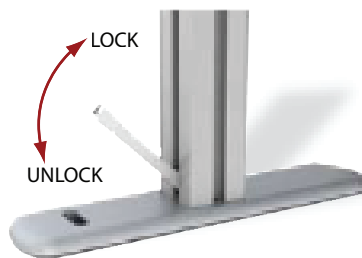

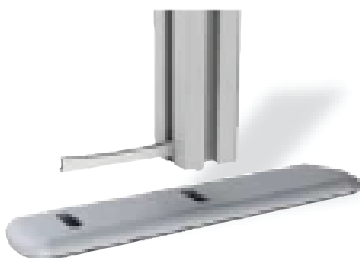

4m x 2m single wall layout

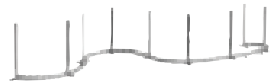

- Flex the entire display to create the shape you need.
- All Wave graphics are 800mm wide so you can add or delete sections to create the length of display you need.
- Simple tool-less assembly means set-up is both fast and easy. Fits easily into the boot of a car.
- i-line Intelligent Graphic Alignment System automatically aligns the graphics magnetically.
- Multiple base options give maximum stability - even close to walls.
- Tensionless graphics are easy to hang and never curl at the edges.
- Build in heavy items such as LCD/TFT screens.
- Attach tables or shelves in seconds.
- Perfect for shell schemes or space only venues.
- Auto-float means graphics align even if the floor is not level.

FASTclamp™ connects the post to the base support instantly without tools

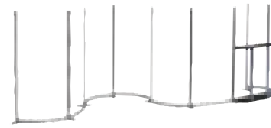

Push to lock, lift to release. So simple you'll wonder why it's never been done before.
